STATE OF NEW HAMPSHIRE

AGENCY REAL PROPERTY REPORTS

REQUIRED BY RSA 4:39-e

FOR THE FISCAL YEAR ENDED JUNE 30, 2015

4:39-e Real Property Owned or Leased by State Agencies; Reporting Requirement.
I. On or before July 1, 2013, and biennially thereafter, each state agency, as defined in RSA 21-G:5, III, shall make a report identifying all real property owned or leased by the agency. For each parcel owned by the agency, the report shall include any reversion provisions, conservation or other easements, lease arrangements with third parties, and any other agreement that may affect the future sale of the property. For each parcel leased by the agency, the report shall include the lease term.

II. Each state agency shall file the report with the governor, the senate president, the speaker of the house of representatives, the chairperson of the senate capital budget committee, the chairperson of the house public works and highways committee, the chairperson of the long range capital planning and utilization committee established in RSA 17-M:1, and the commissioner of the department of administrative services.

III. The commissioner of the department of administrative services shall develop a standard format for agencies to use in submitting the report required under this section. The form of the report shall not be considered a rule subject to the provisions of RSA 541-A. (Source. 2012, 254:1, eff. June 18, 2012.)

Introduction and Notes

In developing a standard format for all agencies to use in submitting the report required by RSA 4:39-e, Administrative Services (DAS) staff designed and constructed a central state real property database to receive, store, maintain and manage information on all real property assets owned or leased by the State of New Hampshire, and from which all agency reports are generated. Various upgrades and enhancements have been made over the past fiscal year, and the implementation of a data management application is ongoing. In general, the real property database project continues to progress toward the goal of providing a powerful and valuable tool for more consolidated and effective real property asset reporting and management, long-term planning, and interagency coordination to be used by the legislature, the executive administration, individual agencies, and the general public.

Notes on certain limitations of the 2015 reports:

1. The statute requires each agency to identify “all real property owned or leased by the agency” in its report. Time and resource constraints, and a need for simplicity to maximize agency participation and compliance, have caused this set of reports to be limited to land and building assets only.

2. All data is presented as provided by each agency. DAS has been advised by multiple agencies that some of their assets have been excluded as a result of technical issues presented by the disparate data storage media or formats that they employ. For example, the Department of Transportation has specifically indicated that its data excludes: sand/gravel pits, sand/salt sheds, storage sheds, railroad corridor land, and “infrastructure properties used as the right of way for Roads, Bridges, Railroads, Rest Areas, Park and Ride or Turnpike Toll Operations that are either fully constructed or in Project Development.” Certain agencies have provided incomplete data on their reported assets for similar technical reasons.

3. The statute requires each agency to report information on the status of title and all encumbrances for every single parcel of land owned by the agency. However, many agencies have insufficient personnel and other necessary resources to achieve full compliance with the statute and/or a lack of understanding within the agency of the scope and complexity of the information required by the statute and how to find it.

4. Several assets have been reported in whole or in part by more than one agency, signaling a need for interagency coordination in real property asset management and reporting.

5. Agencies that claim to own or lease no land or buildings are omitted from the following reports.
