Bulk Laundry Chemicals
New Hampshire Hospital & Glenciff Home for the Elderly

SPECIFICATION COMPLIANCE:
Changes from the current chemicals being used at NH Hospital require the evaluation and approval of the “New Product Evaluation Committee” of NHH per Hospital policy, “Product Evaluation & Standardization Program”.

Specifications of the current laundry chemical pump system (Beta ILS Max) must be maintained. Specifications include: pump rate of 100 ounces per minute, transport pump flow rate of 3.5 gallons per minute, and “out of chemical” alarm. The current pump(s) is supplied by the existing vendor, and must be replaced with an equivalent pump by the Contractor within fifteen (15) business days after contract award.

The seven (7) patient care unit pumps at New Hampshire Hospital and the three (3) patient care unit pumps at the Glenciff Home for the Elderly must be supplied, maintained, and switched to new machines as necessary by the Contractor.

Replacement patient care unit pumps and the detergent containers must fit within existing “kitchen” style cabinets.

Any technician who enters patient care areas must complete a “Contractor Orientation” provided by the Hospital. This orientation takes approximately two (2) hours to complete.

The Contractor shall:
• Provide regular monthly service on all equipment at no additional cost to the State of New Hampshire. Monthly titration readings are to be taken by the Contractor and supplied to the Laundry Supervisor.
• Provide all equipment, supplied, installed and maintained at no cost to the State of New Hampshire.
• No additional deposits for drums.
• The Contractor shall be responsible for adhering to the ozone contractor at each location. This includes but is not limited to complete compliance with the amount of laundry chemical being dispensed at each location. At no point shall the Contractor make chemical decisions that supersede the ozone contractor.
• The Contractor shall have trained and knowledgeable personnel on staff who can provide technical assistance to State personnel when requested. In the event of chemical pump failure, repair or replacement is required within twenty-four (24) hours of the Contractor being notified of the failure.
• Yearly in-service training for employees or as needed requested by supervisors.
• Contact name and telephone number for emergency use.
• SDS sheets to be supplied with deliveries.
• All wash results to be guaranteed with total re-wash not to exceed 2.5%.

All services performed under this Contract shall be performed between the hours of 7:30 A.M. and 4:00 P.M. unless other arrangements are made in advance with the State. Any deviation in work hours shall be pre-approved by the Contracting Officer. The State requires one-day advance knowledge of said work schedules to provide security and access to respective work areas. No premium charges will be paid for any off-hour work.
