**Group K:** OVERLAY FILMS FOR USE ON RETROREFLECTIVE SHEETING

**NEW PRODUCT OFFERING**

- 1.0 General Characteristics and Packaging.
  - 1.1 Roll Goods. When supplied as roll goods, the Overlay film shall be of good appearance, free from ragged edges, cracks and extraneous materials. The maximum number of splices in each roll shall be three per 50 yards of material. Splices shall be butted. The sheeting shall be packed snugly in corrugated fiberboard cartons, in accordance with commercially accepted standards. Each carton shall clearly stipulate the brand, quantity, size, lot or run number, and color. Stored under normal conditions the Overlay film as furnished shall be suitable for use for a minimum period of one year.
  - 1.2 Sign Faces. When supplied as a finished sign face or mounted sign, the sign face, made of Overlay film and retroreflective sheeting, shall comply with the appearance, specification, and good workmanship designated by the using agency for sign faces constructed of colored retroreflective sheeting of the same type.
- 2.0 Performance Requirements and Obligations.
  - 2.1 Certification. The film manufacturer shall submit with each lot or shipment, a certification which states that the material supplied shall meet all of the requirements listed herein.
  - 2.2 Field Performance Requirements. The Overlay film applied to retroreflective sheeting, both materials applied in accordance with the manufacturer's recommendations, shall as a composite perform with the same effective performance life as the using agency specifies for that type of colored retroreflective sheeting. The composite sign shall be considered unsatisfactory if it has deteriorated due to natural causes to the extent that: (1) the sign is ineffective for its intended purpose when viewed from a moving vehicle under normal day and night driving conditions; or (2) the coefficient of retroreflection is less than the minimums specified by the using agency for colored retroreflective sheeting.
  - 2.3 Overlay Film Manufacturer's Replacement Obligation. Where it can be shown that retroreflective traffic signs with Overlay film supplied and used according to the film manufacturer's recommendations have not met the performance requirements of Section 2.2, the film manufacturer shall cover restoration costs as provided in the using agency specification for colored retroreflective sheeting.
  - 2.4 Government Using Agency Obligation. The using agency shall be responsible for requiring dating of all signs at the time of application. That date constitutes the start of the field performance obligation period.
- 3.0 Technical Assistance Requirements
  - 3.1 Instruction and Training. As requested the manufacturer supplying the Overlay film requirement shall provide the services of a qualified technician for instruction and training at the primary sign manufacturing facility designated by the agency. This instruction shall be available on a quarterly basis if needed at no additional cost, and shall include but not be limited to, training films, material application, equipment operation, packaging, storage and other proven sign shop practices as they apply to the Overlay film supplied by the manufacturer, and to assure that the resulting signs can comply with the applicable specifications. Additional on-site technical assistance by the manufacturer supplying the Overlay film shall be provided at each of the sign shops designated in the bid invitation. This assistance shall be provided at least once each quarter of sign production, if required
