

## Anthem Cyber Attack Statement

Anthem, the State of NH's third party medical administrator for the active employee and retiree health benefit plans since 2008, announced that it has been the target of a sophisticated cyber attack. The Department of Administrative Services (DAS) has been working with Anthem to ensure that we have the most up to date information about the breach and how it may affect our health benefit plan members and former members.

Anthem reported that this breach does not appear to include personal health information or credit card information. The breach does, however, include names, dates of birth, medical IDs/social security numbers, street addresses, email addresses and employment information.

In its statement, Anthem indicated that it will be notifying by mail all members and former members who are affected and will provide those members with free credit monitoring and identity protection services. If you have registered on Anthem.com for email updates from Anthem, you can expect to receive an email update from Anthem notifying you about the cyber attack.

Anthem has created a dedicated website, [www.AnthemFacts.com](http://www.AnthemFacts.com), where members and former members can access information and review Frequently Asked Questions. Anthem has also established a dedicated toll-free number, 1-877-263-7995, that people can call for information about this incident. You can call Anthem or check its website for updated information.

Anthem is working with the FBI and one of the world's leading cyber security firms, Mandiant, to determine the scope of the breach. DAS will continue to work with Anthem to ensure the State's concerns are addressed.
