PRO-RELEASE

Chemically active, multi-purpose, water based concrete form release agent.

Cold weather additive: PRO-RELEASE with WINTER GUARD
 Concentrated: PRO-RELEASE CONCENTRATE

HOW IT WORKS

PRO-RELEASE is an economical, water based, general purpose concrete form release agent that combines both chemically active and barrier-type components for improved performance with most concrete mix designs, including mix designs incorporating pozzolans such as fly ash or blast furnace slag.

APPLICATIONS

- ◆ Use on steel and fiberglass in precast applications, low-cost overlaid import plywood, curb and gutter forms, plastic and plywood faced handset forms.
- ◆ Use in commercial and residential concrete forming applications.

ADVANTAGES

- ◆ Economical alternative to higher cost specialty type form release agents where cost per gallon considerations outweigh performance requirements.
- ◆ Chemical and barrier components provide improved release for most concrete mix designs, including mixes containing pozzolans such as fly ash or blast furnace slag.
- ◆ Dries fast and is not slippery.
- ◆ Resists removal by normal rain showers.
- ◆ Low odor, nonflammable, water based formulation is safe to use and meets all federal and state VOC requirements.
- ◆ Green Engineered™ – better for health and the environment.
- ◆ Available with Winter Guard™ additive for cold weather application and storage. With Winter Guard,™ PRO-RELEASE can be safely applied at temperatures above 25° F (-4° C) and can be stored at temperatures below 25° F (-4° C) without damaging the emulsion.
- ◆ Available as PRO-RELEASE CONCENTRATE which can be easily diluted with water, kerosene or fuel oil and provides excellent emulsion stability. When mixed with water, PRO-RELEASE CONCENTRATE components stay mixed longer.
- ◆ Variable dilution rate allows user the freedom to maximize PRO-RELEASE CONCENTRATE performance depending on concrete mix design, stripping schedule and weather conditions by simply adjusting the dilution mix ratio.
- ◆ PRO-RELEASE CONCENTRATE can also be used as a form maintenance coating to soften concrete buildup on forms by simply reducing the dilution ratio.
- ◆ PRO-RELEASE CONCENTRATE will not freeze unless diluted with water.

▲ PRECAUTIONS ▲

- ◆ Water based, chemically active form release agents are not visible on applied surfaces once dry. This is normal and does not affect release agent performance. After form stripping, a white, powdery film will be present on form surfaces. This causes no adverse effects on the form or the concrete and should not be confused with buildup.
 - ◆ Not recommended where forms are to be removed in less than 12 hours, unless artificial heat or accelerating admixtures are used to hasten development of concrete surface strength.
 - ◆ Protect PRO-RELEASE from freezing. If allowed to freeze, product packaging may rupture and the emulsion stability of this product may be affected, making it difficult to keep product mixed during application. Product which is suspected of freezing should not be used. PRO-RELEASE CONCENTRATE is not freezable unless diluted with water. If diluted with water and allowed to freeze, product may separate, rendering it unsuitable for use. PRO-RELEASE with WINTER GUARD™ can be successfully applied at temperatures as low as 25° F (-4° C) and can be stored at temperatures below 25° F (-4° C) without damaging the emulsion. Product must be 25° F (-4° C) or more before use. Do not store at temperatures below -10° F (-23° C).
 - ◆ Do not apply PRO-RELEASE if temperature is at or below 32° F (0° C). Applications of PRO-RELEASE that have dried are not affected by freezing temperatures. For application in temperatures as low as 25° F (-4° C), use PRO-RELEASE with WINTER GUARD.™
 - ◆ Allow applied product to dry thoroughly before coming into contact with rain or wet concrete. Dry time will vary based on ambient temperature and humidity conditions. Reapply product if treated form surface is exposed to rain prior to drying.
 - ◆ Diluting PRO-RELEASE CONCENTRATE with a petroleum distillate such as kerosene or fuel oil may result in exceeding federal or state VOC regulations. Contact NOX-CRETE for specific information concerning your application.
 - ◆ Generally not recommended for use in architectural concrete forming applications without verifying performance and concrete appearance with a field-scale mock-up.
- ## USE INSTRUCTIONS
- ◆ Request current product literature, labels and material safety data sheets from manufacturer and read thoroughly before product use.
 - ◆ Site environmental conditions, concrete mix designs,

substrate conditions and construction have a major effect on product selection, application methods, procedures and rates, appearance and performance. Product literature provides general information applicable to some conditions. However, an adequate site test application by the purchaser or installer in advance of field scale use is mandatory (irrespective of any other verbal or written representations) to verify that product and quantities purchased can be satisfactorily applied and will achieve desired appearance and performance under intended use conditions.

- ◆ The typical application rate is 600 - 800 sf/gal (15 - 20 sm²/l) depending upon substrate. Conduct a test application to verify the proper application rate for your use.
- ◆ PRO-RELEASE CONCENTRATE must be diluted prior to use. Product may be diluted with water, kerosene or fuel oil (see Precautions). Typical dilution rate is one part PRO-RELEASE CONCENTRATE to six parts diluent. For use as a maintenance coating, dilute one part PRO-RELEASE CONCENTRATE to three parts water or other diluent.
- ◆ To simplify dilution of PRO-RELEASE CONCENTRATE with water, use NOX-CRETE'S MIX STATION which provides accurate, dependable and economical dilution and mixing performance. Comes equipped with mixing plugs to accommodate varying product temperature conditions - see chart to the right.
- ◆ Pro-Release is best applied using a low pressure sprayer. For hand pump spray applications, use Nox-Crete's Perfect Form And Concrete Sprayer or the more economical Ideal Form And Concrete Sprayer. Obtain best results by applying a uniform application of Pro-Release immediately following form stripping. Allow coated form surfaces to dry prior to placing concrete.
- ◆ Avoid over application and remove excess material, runs and puddles with rags.
- ◆ Prevent material overspray from contacting reinforcing steel and/or tensioning cables.
- ◆ Application equipment and overspray can be cleaned with detergent and water.
